**IN THE MATTER OF** the creation of “International Tribunal for Natural Justice and joining forces with EPHRA Emerging Peoples Human Rights Authority”;

## International Public Notice

The creation of the private organization called the International Tribunal for Natural Justice <http://www.itnj.org/> may be privately legitimate. However, the individuals involved within the metes and bounds of The United States of America are notwithstanding.

1: The individuals listed on the website are considered U.S. citizens and residents of the states. They are without any legal standing to hold a court, they are without any form of jurisdiction and further without any standing to enforce the rule of law.

2: The individuals such as Rod Class or Dan Mahnke are with a sinister political agenda. Neither one of those men are parties to the U.S. constitution nor any state constitutions. Neither one of the aforementioned men has anything to do with any political parties, no oaths or affirmations to any of the states, and are considered “stateless persons”. Both of the aforementioned men have been told over and over about their condition and have consistently refused to follow the rule of law. Human Rights are being used as a political weapon, even though neither of the men are a part of any political party.

3: If both organizations are going to do business within the metes and bounds of The United States of America. It is required that they register with the Government of The United States of America, <http://theunitedstatesofamerica1781.com> otherwise face Human Rights Violations from The Human Rights Tribunal: <http://humanrightstribunal.international>.

4: The Government of The United States of America will not tolerate any International organization created within its metes and bounds without its authority particularly when in its mission statement it reads:

Quote: “The International Tribunal for Natural Justice (ITNJ) is established to defend humanity against all fictions created by privately owned corporations which serve shareholders at the expense of people and planet. (violations of private contract rights of people)

The ITNJ is constituted to uphold natural justice as the foundational tenet of human expression beyond the artifice of borders and boundaries.” End quote

This particular mission statement violates every natural right of self determination, the right to a Nationality (Article 15 UDHR) and the basic principles of the Law of Nations.

Warning: EPHRA <http://ephra.net/n> has joined with a group of people that have a history of anti-rule of law, anti Government, anti-metes and bounds, anti-anything that has to do with any form of Government. Further, most in the group are out to exact revenge that somehow has offended their view of justice without self correction first.

If this International Tribunal for Natural Justice is allowed to move forward in its current condition. The Government of The United States of America will be filing multiple Human Rights Violations against everyone of its members if found doing business within the metes and bounds of The United States of America without registering with the Government first. Registration is for the purpose making sure these individuals have the proper standing to operate Internationally. The current conditions are doing nothing but putting these individuals in danger of being labeled permanent political prisoners in a private detention center by their own acts and omissions.

If the Government of The United States of America can find 2 major Human Rights violations in one mission statement, what makes EPHRA think that the aforementioned private organization is qualified to hear cases and properly judge Human Rights Violations?

Kind Regards,

**Thomas Frank Goudey**

Secretary of State for The United States of America

The Government of The United States of America,
